

Different possibilities,
one solution:
Microcement, naturally.

Without limits

Microcement is a continuous coating ideal for any room in your home and even in swimming pools. With a thickness of 1 to 3 mm it can be applied directly on any surface.

Its artisan application makes that the result of each work is unique and exclusive. It offers elegant solutions to integrate floors and walls both indoors and outdoors.

MICROBASE

Basis for a good application, rustic and decorative effect.

MICROFINO

Traditional, sophisticated, lively and elegant for walls. Traditional Microcement soft, fine and elegant.

MICRODECK

Very resistant Microcement for continuous floors.

MICROSTONE

Microcement for exteriors, textured and anti slip.

AQUACIMENT

Ideal for coating environments in permanent contact with water.

More than just colours

Wide selection colour chart, greys, browns, lively and neutral, as well as decorative metallic paints for metallic or rust effect.

A wide range of products which allows you to apply microcement on almost any surface.
